📁 Adventurw

📋 PROFESSIONAL SUMMARY

Detail-oriented and motivated Computer Science graduate from FAST NUCES with hands-on experience in manual testing, API testing, and automation testing using Playwright. Strong understanding of Software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC), with the ability to identify, document, and track defects effectively. Familiar with tools such as Jira, Postman, and Git, and eager to build a career in Software Quality Assurance by contributing analytical thinking, problem-solving abilities, and a strong willingness to learn automation frameworks and QA best practices.

🧠 TECHNICAL SKILLS

Testing & QA

Manual Testing, Functional Testing, Regression Testing, API Testing, Test Case Writing, Bug Reporting, Automation Testing, Playwright

Tools

Jira, Postman, Playwright, Git, VS Code

Programming

Python, JavaScript, Java, C, C++

Web Technologies

HTML, CSS, React, Bootstrap

Backend & Databases

Node.js, Django, MySQL, MongoDB, PostgreSQL, SQLite

Concepts

SDLC, STLC, REST APIs, OOP, Data Structures, Operating System

📁 EXPERIENCE

FAST NUCES

Teaching Assistant

08/2025 – 12/2025

- Assisted students in understanding English grammar, writing, and comprehension concepts
- Conducted one-on-one and group sessions to improve reading and communication skills
- Reviewed and provided feedback on essays, assignments, and written submissions
- Designed supplementary learning materials to reinforce language fundamentals
- Improved student engagement through interactive discussions and practical examples
- Developed communication, collaboration, and problem-solving abilities
- Supported structured learning and classroom management in academic settings

🎓 EDUCATION

BS Computer Science

FAST NUCES

2022 – 2026

📁 PROJECTS

Automation Testing Project

Playwright, JavaScript

- Developed automated test scripts for 80+ testcases using Playwright for web application testing
- Executed functional and regression testing scenarios to improve software reliability
- Reduced repetitive manual testing effort through automation

Manual Testing Project (Adactin Hotel Website)

JIRA

- Designed 10+ test cases for a web application (Login, Signup, Dashboard)
- Performed functional and regression testing

- Documented bugs with detailed steps and expected results

GDPR-Compliant Hospital Management System

Python, Streamlit, SQLite

- Performed testing and validation of system modules to ensure secure functionality
- Verified role-based access controls and system workflows
- Conducted API and database validation during development
- Collaborated on debugging and improving system reliability

MathScript Compiler

Python

- Conducted extensive testing across multiple test suites to validate compiler functionality
- Identified logical and parsing issues through systematic debugging
- Achieved 100% success rate across 11 testing suites
